The Lectureship Fund

The Morris Katz Lectureship was made possible by the establishment of an Endowment Fund created through contributions from his family, his friends, his colleagues, private companies, universities and government. It is intended that this lectureship become self sustaining. Major contributions in support of this year's lecture have been made by:

> Air & Waste Management Association (Ontario Section)

Canadian Institute for Research in Atmospheric Chemistry

Centre for Atmospheric Chemistry (York University)

If you share in Morris Katz' enthusiasm and commitment to having a cleaner environment, please make a contribution to support this ongoing educational activity. Send your contribution in care of:

The Morris Katz Memorial Lectureship Centre for Atmospheric Chemistry York University. 4700 Keele Street North York, Ontario M3J 1P3

For information:

Carol Francis (416) 736-5586 or Fax: 736-5690

Transcripts of the 1992 Lecture are available to all contributors. A videotape will also be available to new contributions of \$100 or more.

1992 MORRIS KATZ MEMORIAL LECTURESHIP IN ENVIRONMENTAL RESEARCH

Professor John D. Spengler

Professor of Environmental Health Sciences Harvard University School of Public Health Boston, Massachusetts

"Ambient and Indoor Air Pollution: Old Story – New Insights"

> 4 March 1992 4:00 p.m.

Senate Chamber, Ross Building York University

York University Centre for Atmospheric Chemistry

John D. Spengler is a Professor of Environmental Health Sciences and Director of the Exposure Assessment and Engineering Program in the Department of Environmental Health, at Harvard University's School of Public Health, Boston, Massachusetts. He received a B.S. degree in physics (1966) from the University of Notre Dame, a Ph.D. degree in atmospheric sciences (1971) from the State University of New York-Albany, and a M.S. degree in environmental health sciences (1973) from Harvard University.

Professor Spengler has conducted research in the areas of personal monitoring, air pollution health effects, aerosol characterization, indoor air pollution and air pollution meteorology, and has published extensively in each of these areas. Recently, he completed a book with Dr. John Samet entitled <u>Indoor Air Pollution: A Health Perspective</u>. published by John Hopkins University Press. He is also on the editorial board of the new journal Indoor Air.

Professor Spengler is currently a member of the EPA Science Advisory Board, serving primarily on the Research Strategies Advisory Committee, the National Academy of Science's Committee on Risk Assessment of Hazardous Air Pollutants, and the American Chemical Society's committee "Task Force on Air Toxics". In addition, he is a member of the Air & Waste Management Association and the American Meteorological Society. During the summer of 1990, Professor Spengler served as co-chairman of a technical session on the characteristics of indoor air, at the Fifth International Conference on Indoor Air Quality and Climate, in Toronto, From 1983 through 1988, he was an advisor to the World Health Organization on matters of indoor air pollution and personal exposure. In the past, Professor Spengler has served on National Academy of Science committees evaluating air pollution epidemiology, passive smoking, and aircraft quality and safety; he served as chairman of the National Academy of Science's Committee on Indoor Pollutants from 1979-1981.

The Lectureship

To recognize and pay tribute to Morris Katz' contribution to Environmental Science Research in Canada, and to follow through on his initiative in promoting a cleaner environment, his friends and colleagues have established the Morris Katz Memorial Lectureship. This lectureship involves an annual lecture to be presented by an international leading figure in Environmental Research. The lecture is open to the general public.
